DIMECO, all your press environment from one single source

Press feed line "long line"

3 in 1 "best cost" solution

Press feed line "short line"

Racks for coil storage
Coil tilting units
Coil cars
Uncoilers
Straighteners
Corrective levellers
Servo feeds
Quick die change systems
Tool loading car
Racks for tool storage
Die control units
Press safety monitoring
Stackers
Pick & place - transfers

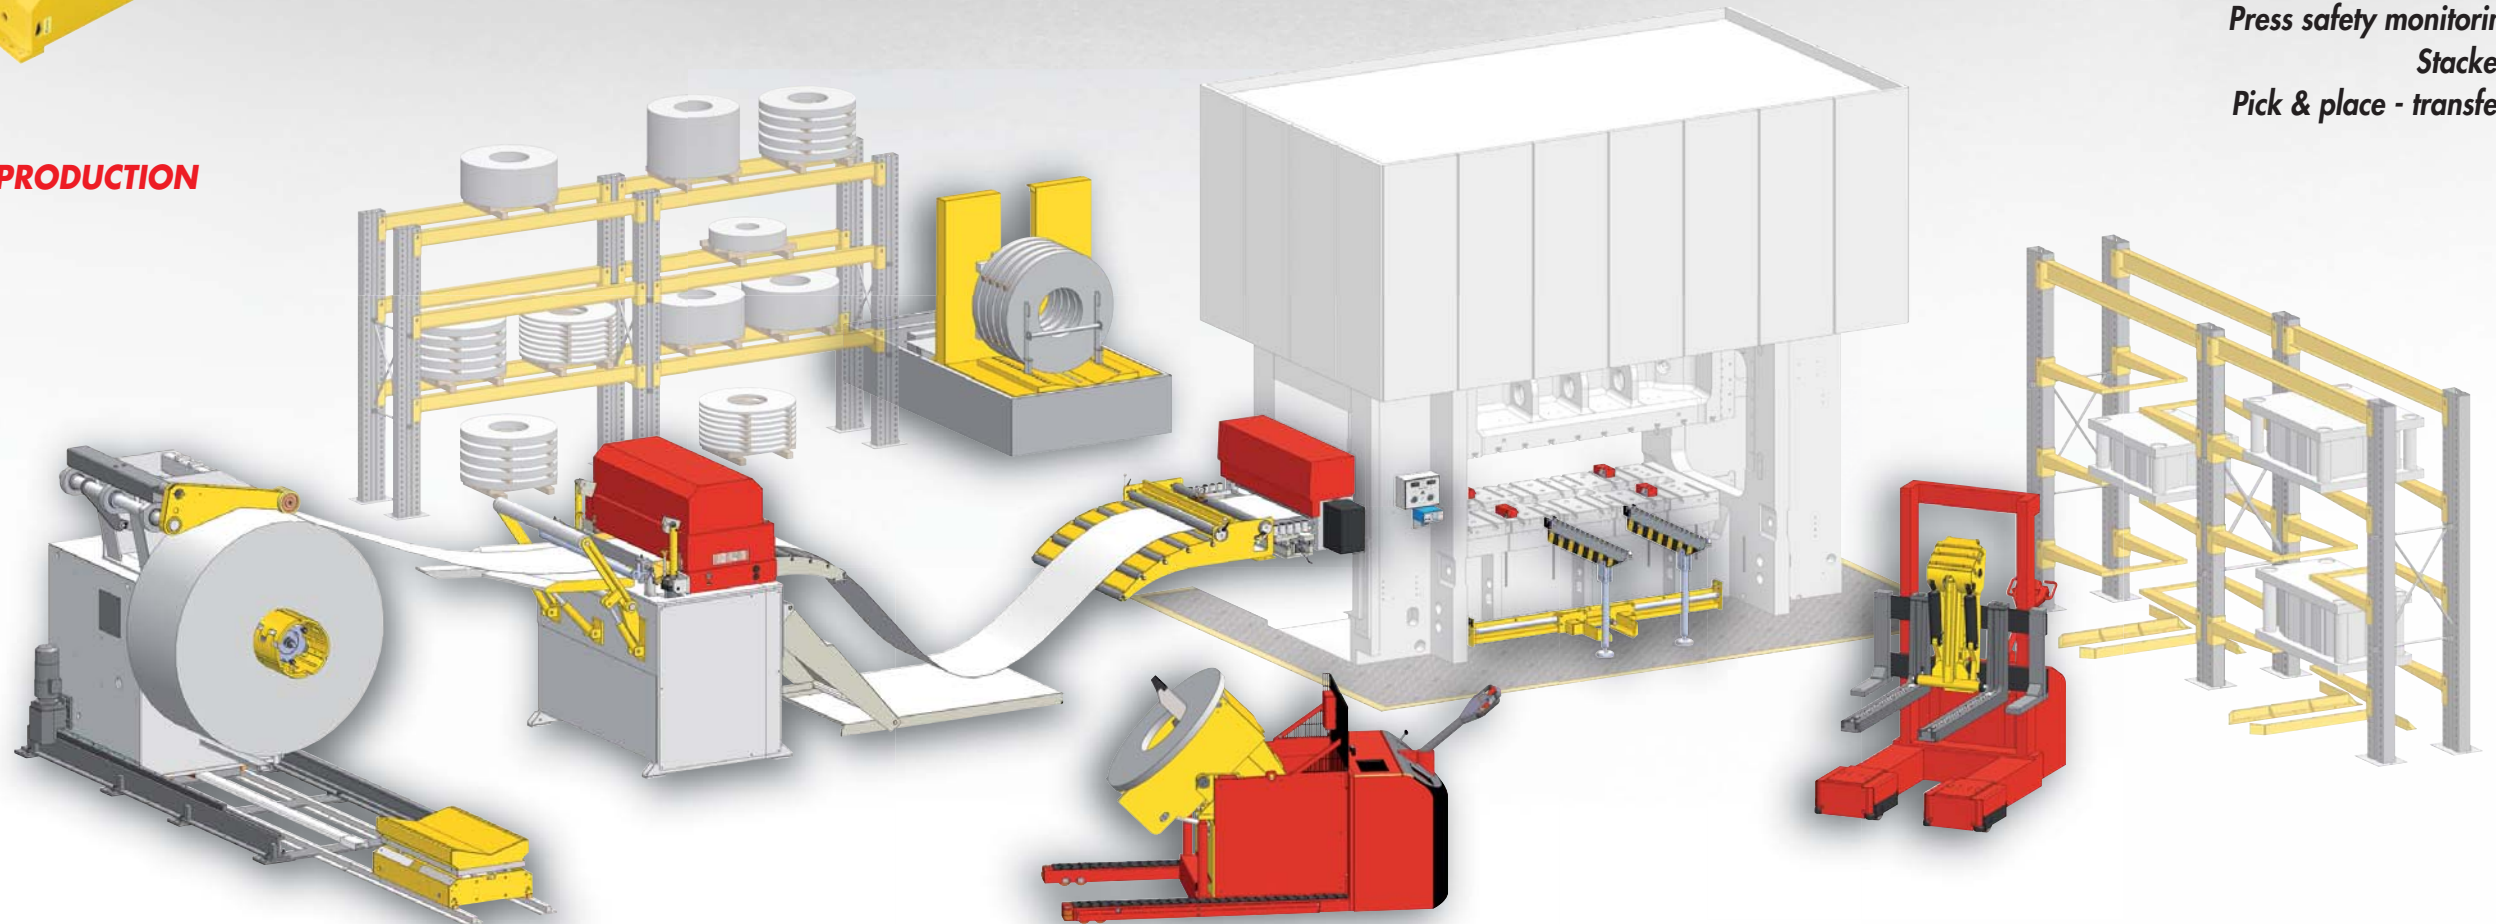

**THE WORLD WIDEST RANGE
OF MACHINES FOR SHEET METAL PRODUCTION
SYSTEMS FROM COIL**

- from 200 kg to 35 ton coils
- from 200 mm to 2000 mm wide strip
- from 0,2 to 9 mm material thickness
- tool weight up to 25 tons

Coil handling : Quickcoil

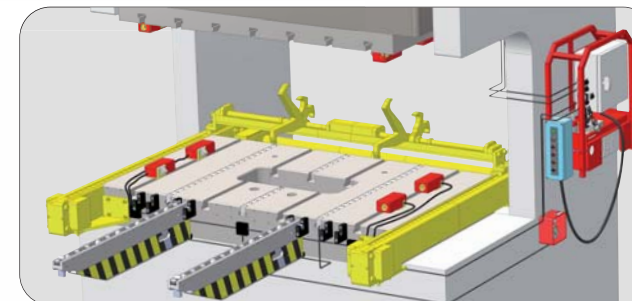

Double uncoilers

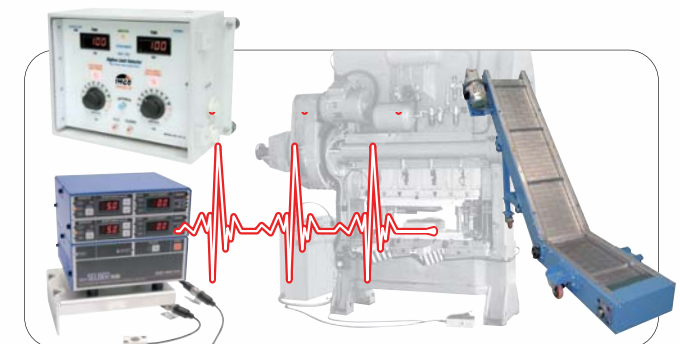

ZIG-ZAG feeders

Tool handling : Quickblock

Press equipment for quick die change system

Press monitoring & accessories

Hydraulic presses and production lines

Turnkey solutions

**Tailor-made equipment,
according to customer
specifications**

Designers and manufacturers of hydraulic presses since 1955, MIB Hydro has developed high skills in creation of equipment for high-tech industries (automotive, aerospace, composite industries...).

Our expertise allows MIB Hydro to offer optimized solutions to our most demanding customers, while meeting the highest standards. MIB Hydro manages all aspects of the project, from design to manufacturing of the equipment, including installation in your workshop, all around the world.

Production line

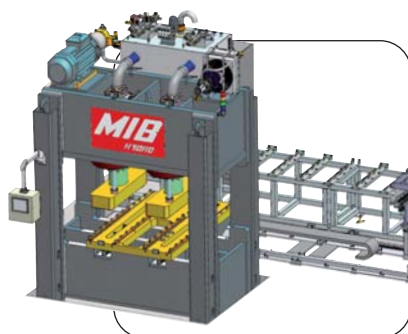

**French manufacturer
of hydraulic presses
since 1955**

Types of manufacturing :

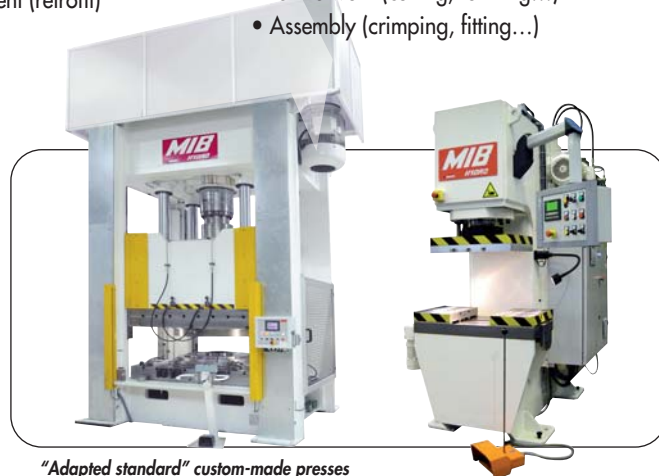

- "Standard adapted" hydraulic presses
- Production lines
- Hot compression presses (composite material)
- Peripheral equipment (tool changing...)
- Equipment refurbishment (retrofit)

Application areas :

- Metal work (deep drawing, straightening...)
- Composite part manufacturing (by R.T.M., S.M.C. processes...)
- Powder compaction
- Textile work (cutting, forming...)
- Assembly (crimping, fitting...)

Peripheral equipment

"Adapted standard" custom-made presses

Turn key system, all equipment from one single source **DIMECO**

FLEXILINES

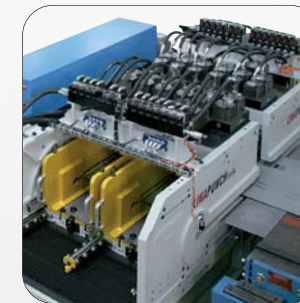

Laser coil Linacut®

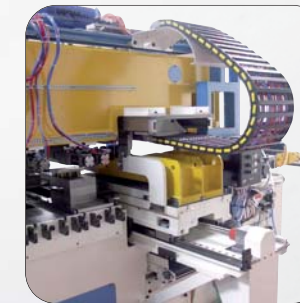

Flexipress® Servo

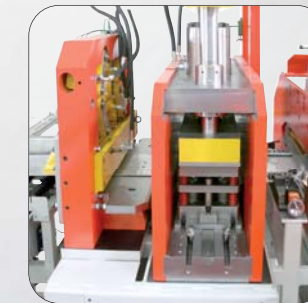

Linapunch MC-E® Servo

Linapunch® YT12 (hydraulic)

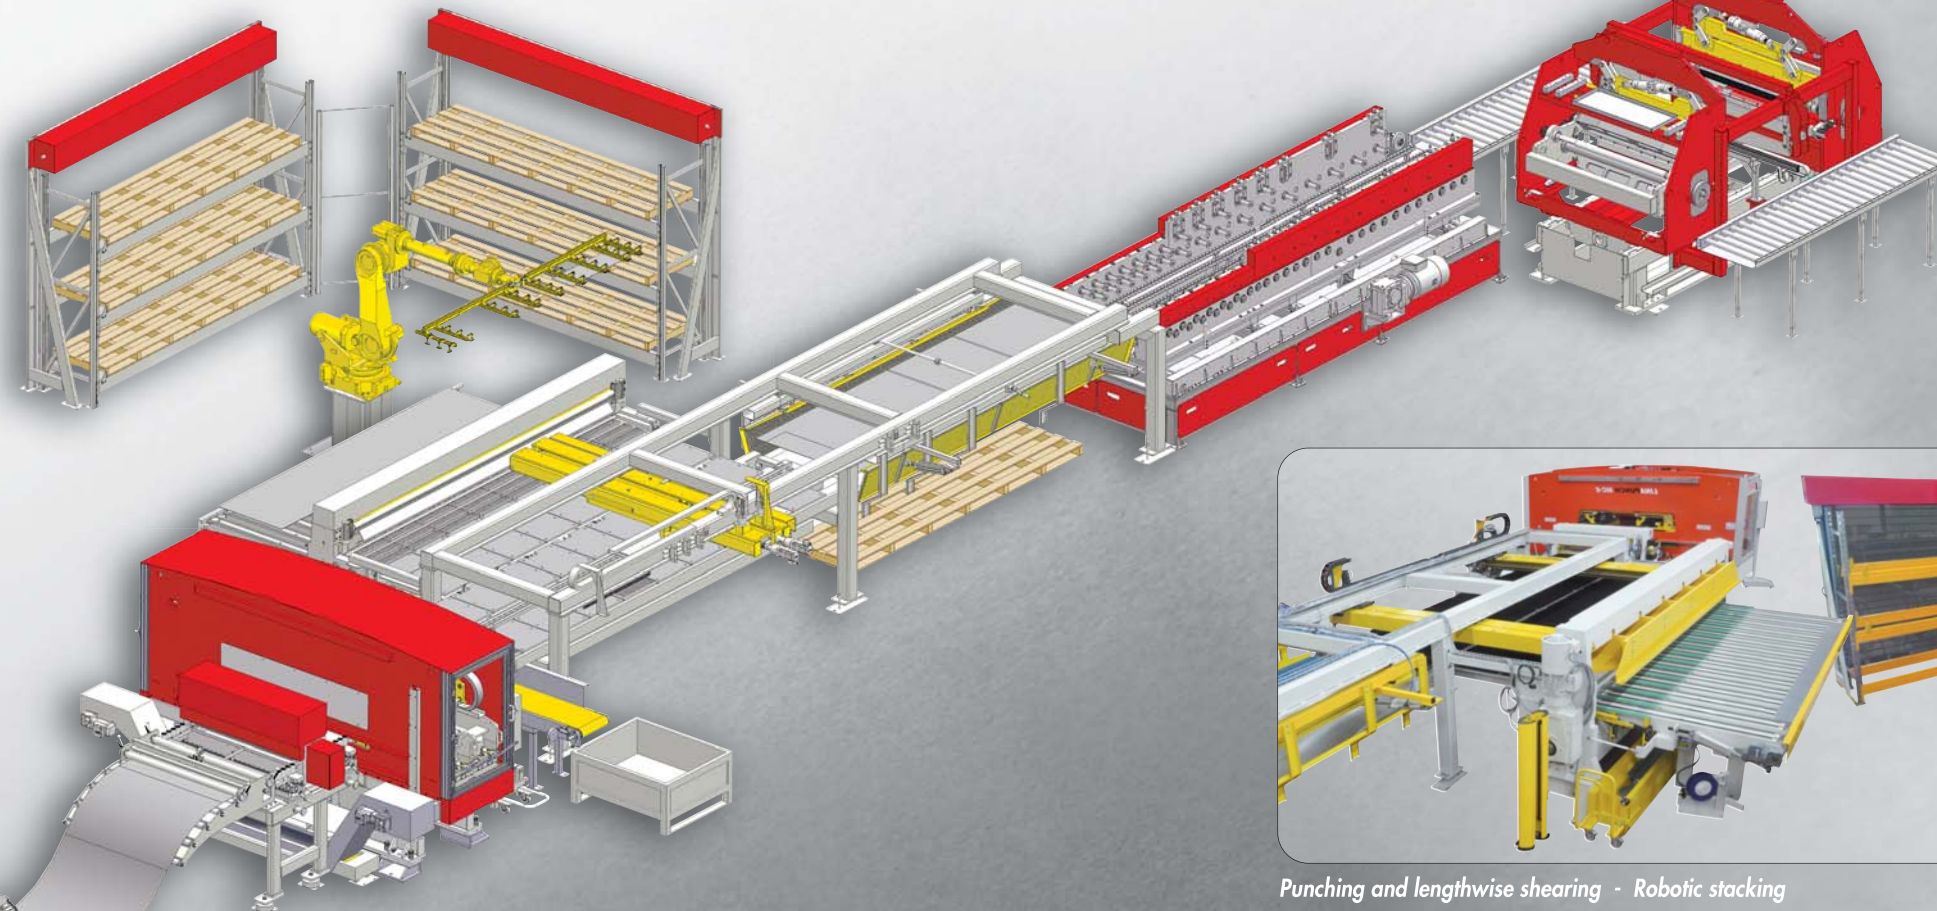

Flexipunch®

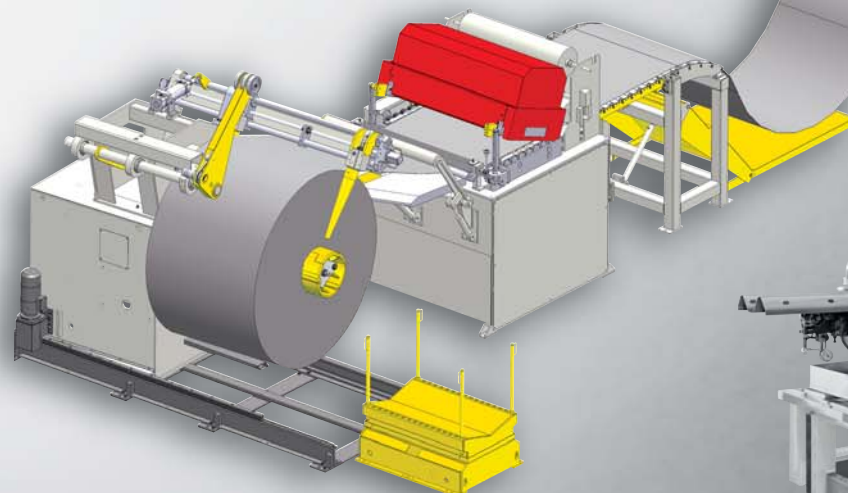

Punching and shearing

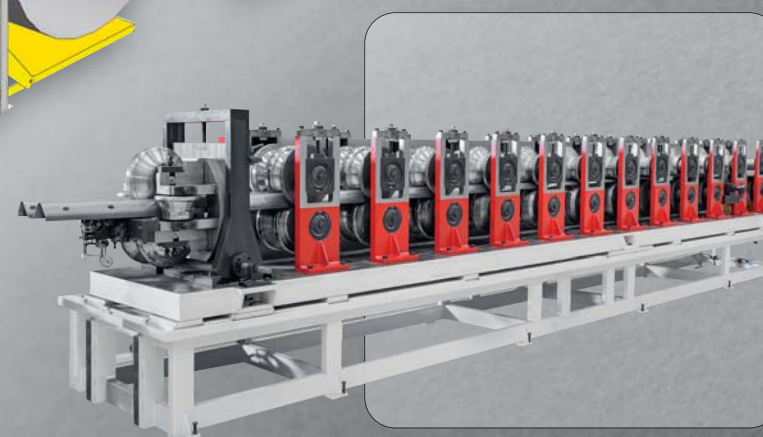

Cut to length line (short & long design)
 Flexible punching machine (hydraulic & servo)
 Servo Flexipress®
 Coil fed fiber laser
 Lengthwise shearing systems
 Rollforming machine
 - cassette or adjustable design
 - profile cutting, start & stop or flying
 Automatic panel benders
 Robotic bending
 Robotic stacking
 Deburring
 Corner forming
 Automatic welding

Punching and lengthwise shearing - Robotic stacking

Rollforming machine and rolls

N.C. bending

Cut to length line

Customer applications

ELECTRIC EQUIPMENT - RACKING & SHELVING - CONSTRUCTION & ROAD SAFETY
AUTOMOTIVE PRODUCTS - HOUSE APPLIANCES AND OFFICE FURNITURE - DISC CUTTING
